LINDSTRÖM[®]

Precision Tools

Delivering consistent, precise performance with a professional feel for users who excel in their field

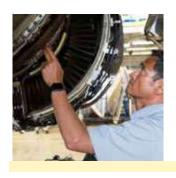

Welcome to the Lindström World of High Precision

LINDSTRÖM SINCE 1856

Lindström is the oldest continuous manufacturer of handtools in existence and yet one of the most forward-looking brands in the world.

We developed the scientific approach to handtool design and created the first truly ergonomic pliers and cutters. We have created more than 1,500 unique tool designs, many of which are now standard types in the electronics and medical device manufacturing industries. Some competitors have been able to implement one facet or another of our manufacturing process. Others have copied the form, appearance and actual part numbers of Lindström tools. However, none have been able to successfully blend all the elements required to achieve the level of performance recognized as true Lindström Precision Tools.

QUALITY

Lindström constantly works on improving quality and the manufacturing process. We test 100% of our products at many different facets of our manufacturing process to ensure the best performance of the tool.

Perfection is difficult to achieve but that is the goal we set for ourselves, and it is the standard our customers expect. Any customer who believes a Lindström branded product is not performing to their expectations should contact us immediately. At any time customers are invited to send tools to us for a free evaluation. We know it can be aggravating when products do not perform as expected, so we try to make it as easy as possible to repair or replace tools when warranted. You are our customer. And our customers know good tools. So we rely on you to let us know when a tool falls short of your expectations so we can change course immediately and keep striving for 100% success.

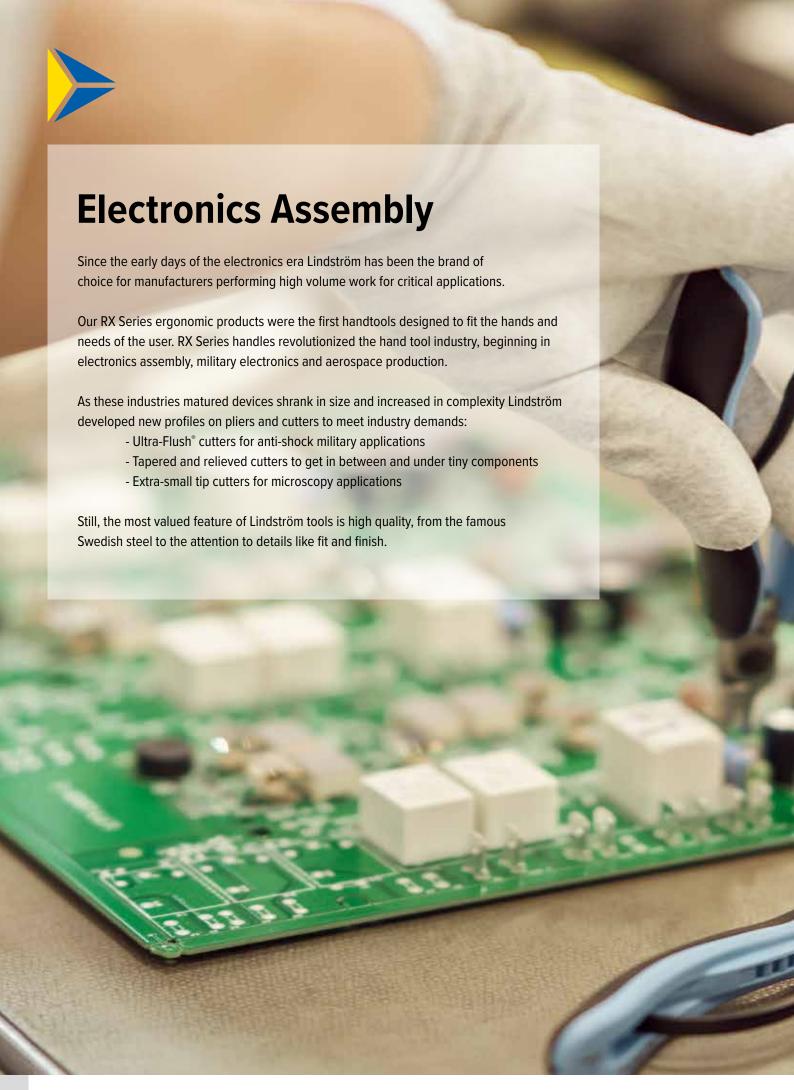

Lindström is one of the Snap-on Industrial brands. Thank you for choosing to be a Lindström customer. Lindström Team.

Medical Device Manufacturing Industry

Lindström is the cutter of choice for manufacturers of medical devices – both for trimming materials and assembling high-tech miniature electronics.

For over thirty years, Lindström cutters have been used to manufacture pacemakers, stents, catheters, guide wires and more. Lindström technological improvements are driven by our customers and their demand for reliable, precise and versatile tools.

Lindström has led the way in providing handtools that perform to the specifications of manufaturers for a wide range of materials including platinum, nitinol, stainless steel, titanium, and proprietary meshes and weaves.

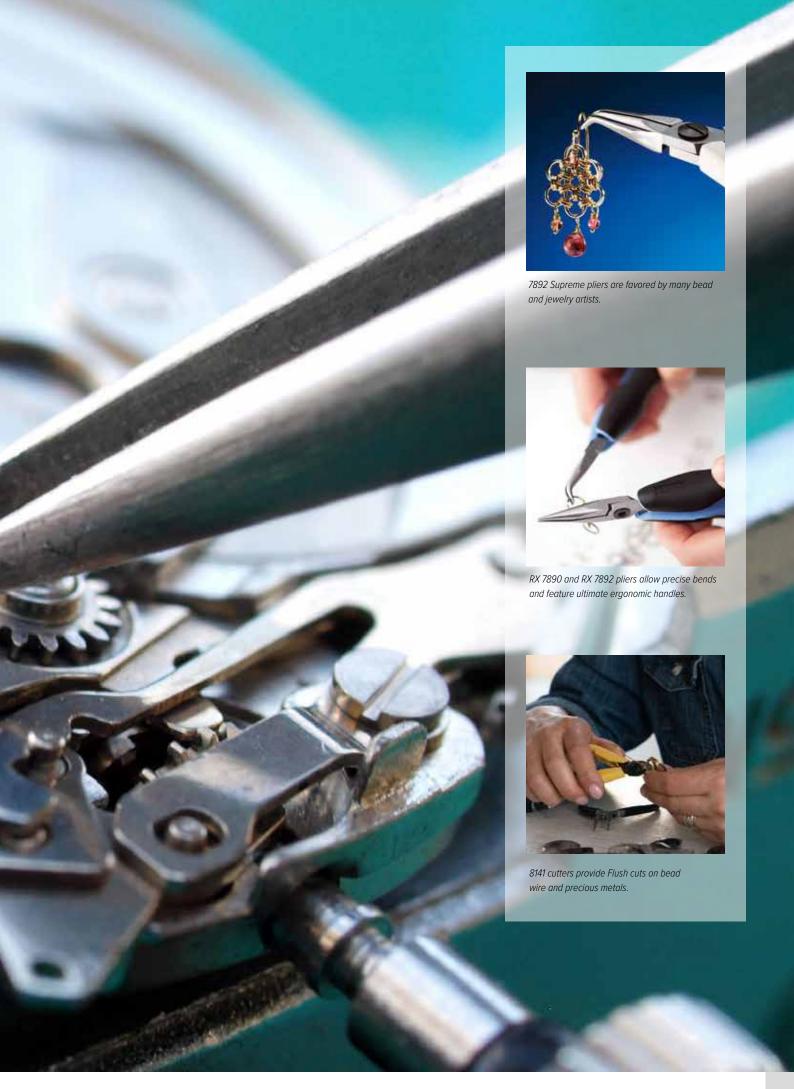

Jewelry & Watchmaking

For more than 165 years Lindström handtools have been the choice of professional jewelry makers.

Today makers of jewelry and hobby creations — and a variety of artists — choose to use our pliers and cutters to create their unique designs, to precisely bend wire and consistently execute flush cuts.

Comfort, balance and ergonomics are important to Lindström users. Our products are an extension of their hands, the means to bring their creativity to fruition with tools they can rely on.

Exacting users demand a flush cut that is truly flush, a joint that keeps the jaws perfectly aligned, and an edge that stays sharp. Trust is crucial. Artistic creations often require expensive materials, with little tolerance for waste.

Cutters

Lindström cutters are designed to perform with ease, minimize operator fatigue and improve productivity. Through symmetric components, exact adherence to specifications and consistent hardening, Lindström delivers hallmark reliability.

The Lindström formula for success, refined over the last 165 years, rests upon the proprietary recipe for the steel from which we make our tools, very similar to that used to manufacture high-performance ball-bearings. The use of ball-bearing grade steel and appropriate heat treatment methods ensures Lindström cutters last longer than other brands used in the same applications. Lindström cutters are elevated to a hardness of 63-65 HRC on the cutting edge. For most manufacturers this hardness level would create a high breakage rate. Yet because of the steel and proper consistency, even when used beyond the rated capacity (as they often are!), Lindström cutters have remarkably little breakage.

PRECISION CUTTING: EDGE BEVEL / CUT RESULT

Micro-Bevel®

- Designed to meet the high quality requirements of our customers
- Leaves a low profile cut result, important for solderability and connectivity
- Unique design with wide cutting range to suit an unmatched variety of uses

Flush NANO PEAK

- Cut result leaves a narrow and short peak along the "pinch" line, decreasing the surface area at the cut
- Improves solderability
- Excellent for reducing lead-shock
- Very popular for the Medical Device and Jewelry manufacturing

Ultra-Flush®

- The finest cut result available with the smoothest lead-end result
- Exceptional solderability
- Ultimate choice for minimizing component and lead-shock
- Perfect for use in close tolerance electronics, aerospace, defense and medical device manufacturing

SHEAR CUTTING: EDGE BEVEL / CUT RESULT

Micro EDGE

- By-pass technology: the blades are marginally misaligned by a mere 0.2 mm
- The specific blade misalignment mitigates wear and prolongs their service life, as the blades never come into contact with one

Flush EDGE

- By-pass technology: the blades are marginally misaligned by a mere 0.2 mm
- Excellent for lead-shock applications and improves solderability
- Delivers a clean, flush cut for applications where precision is of paramount importance

HEAD TYPE

O / Oval

- The most common shape combining strength and durability
- Evenly distributes cutting impact
- Used for a wide variety of applications

T&R / Tapered & Relieved

- Tapered on both sides with underside cut away
- Minimal profile offers access to very limited spaces

low profile, fine lead pitch components

A / Angle /Oblique

- The sides are shaped along diagonal lines
- Improved access where space is limited
- Improved maneuverability with good tool life

Unique Head

- Unique cutting heads developed together with specific end-user to solve critical applications
- Lindström exclusive heads only available within our range

 Specialized adaption allows maximum access and reach

Used under and between

 Extremely small oval head shape for added strength at the tip

TP / Tip

High Cutting Capacity

Limited Access, Low Visibility

HEAD SIZES

XS Extra Small (a) 8.0 / 0.31 (b) 5.0 / 0.20

S Small(a) 10.0 / 0.39
(b) 6.0 / 0.24

M Medium
(a) 12.5 / 0.49
(b) 6.0 / 0.24

L Large
(a) 16.0 / 0.63
(b) 8.0 / 0.31

Width (a) (mm / inch)

Thickness (b) (mm / inch)

Pliers

Pliers replicate the function of the human hand, with greatly increased capability, in particular the thumb and index finger, in terms of force and precision. Holding pliers are available in almost unlimited shapes, styles, configurations, materials and sizes. Lindström's well renowned precision holding pliers are offered in three different series, each able to satisfy the most advanced needs of the professional user: RX Series, Supreme Series, HS Series.

Robust yet precise, Lindström pliers provide an excellent solution to a wide range of application challenges. A variety of handle styles, consistent balance and fine workmanship set our pliers apart from the rest.

SHAPE - MODELS FOR EVERY APPLICATION

Flat Nose = FN

- Flat square shape with parallel jaws provide the most surface area of standard pliers shapes
- · Favored by chainmaille artists

Round Nose = RN

- Round jaws taper from 7 mm to 1.0 mm at the tips
- Handy for closing loops and the finest wire work

Round/Flat Nose = R/F

- · A perfect combination of the Round Nose and Flat Nose
- · Handy for use in making fine curved wire work

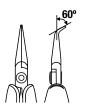

Chain Nose = CN

- · Versatile tips with Lindström's standard perfect joint and tip alignment
- · Named for the work it does so well

Snipe Nose = SN

- Shorter version of the chain nose, with the best gripping strength
- Used where power and torsion are paramount for the application

Bent Nose = BN

- Classic variation of the chain nose, with 60° bend at the tips
- Suited for positioning components or precise chain work

Needle Nose = NN

- ${\:\raisebox{3.5pt}{\text{\circle*{1.5}}}}$ Slimmer, more tapered version of chain nose design
- Allows wire loop work farther into the jaws for better grip and control $% \left(1\right) =\left(1\right) \left(1\right)$

TIP SHAPE (END VIEW)

Flat tip

- Squared and parallel ends of the jaws
- A balance of strength and beauty, evident of tool making craftsmanship

Round tip

- End view of the tips are perfect circles
- Lindström's precision screw joint is the reason these fine tips achieve alignment

Round/Flat tip

· Like a tiny ball peen hammer and anvil, these tips are all business

Chain Nose Tip

· Designed to bend wire, these tips align like D-shaped pinchers

JAW SURFACE OR EDGE

Smooth surface

· Finely milled and polished just enough to retain grip on wire

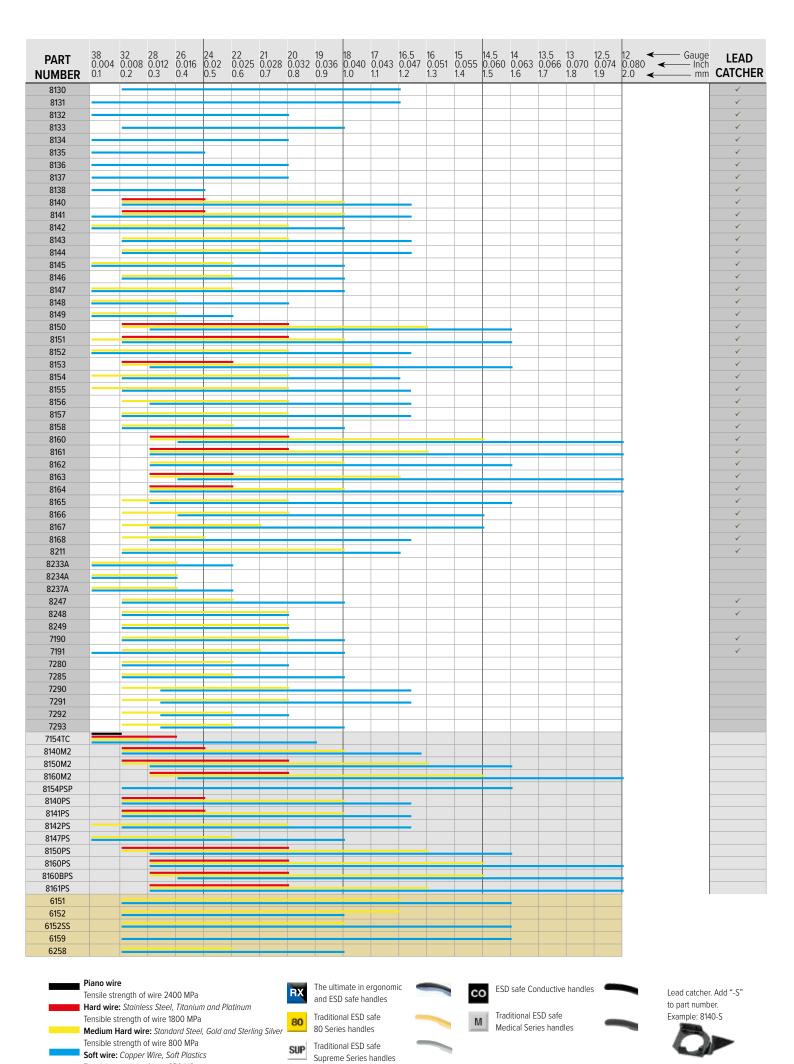

Serrated surface

- Finely honed serrations allow extra "bite" for handling tricky materials
- Cross-hatch serrations prevent objects from rolling into a groove

Tensible strength of wire 250 MPa

RX Series The ultimate in comfort, performance and precision

We have put all of our experience, technical expertise and ergonomic know-how into the successful RX Series. Take a close look at any RX tool, try it out and then compare it to all competitors on the market. Lindström RX Series will always come out on top!

Our scientific ERGO® Development Program (the "11-Point Program") has resulted in many successful and scientifically evaluated ergonomic tools.

While many others just talk about ergonomics, we deliver scientifically validated solutions.

All Lindström cutters and pliers are ESD safe and safely dissipate electrostatic charges, reducing the possibility of damage to sensitive components.

Warning! Lindström cutters and pliers should never be used on electrified equipment.

RX 7891 chain nose pliers. 32 mm jaw length, serrated with radiused edges.

RX 8150 oval head cutter. Ideal for cutting leads, jewelry wire, and general assembly applications.

The original Lindström **80 Series** Cutters

Tried and true performance for the traditional user. The Lindström 80 Series remains the top choice for the traditional user. This range of cutters offers unsurpassed cutting capacity covering a wide range of wire dimensions and types. This is the technology that "started it all" for Lindström.

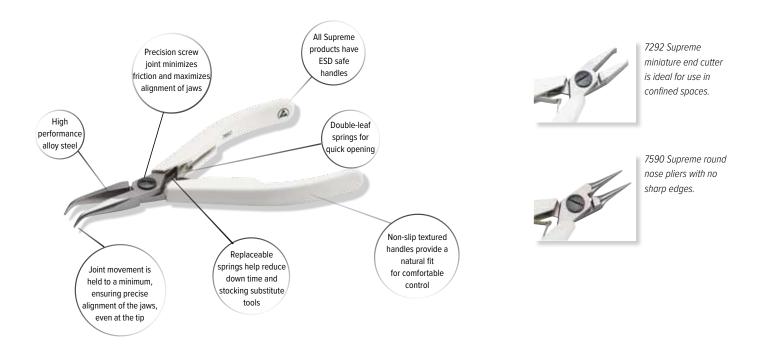

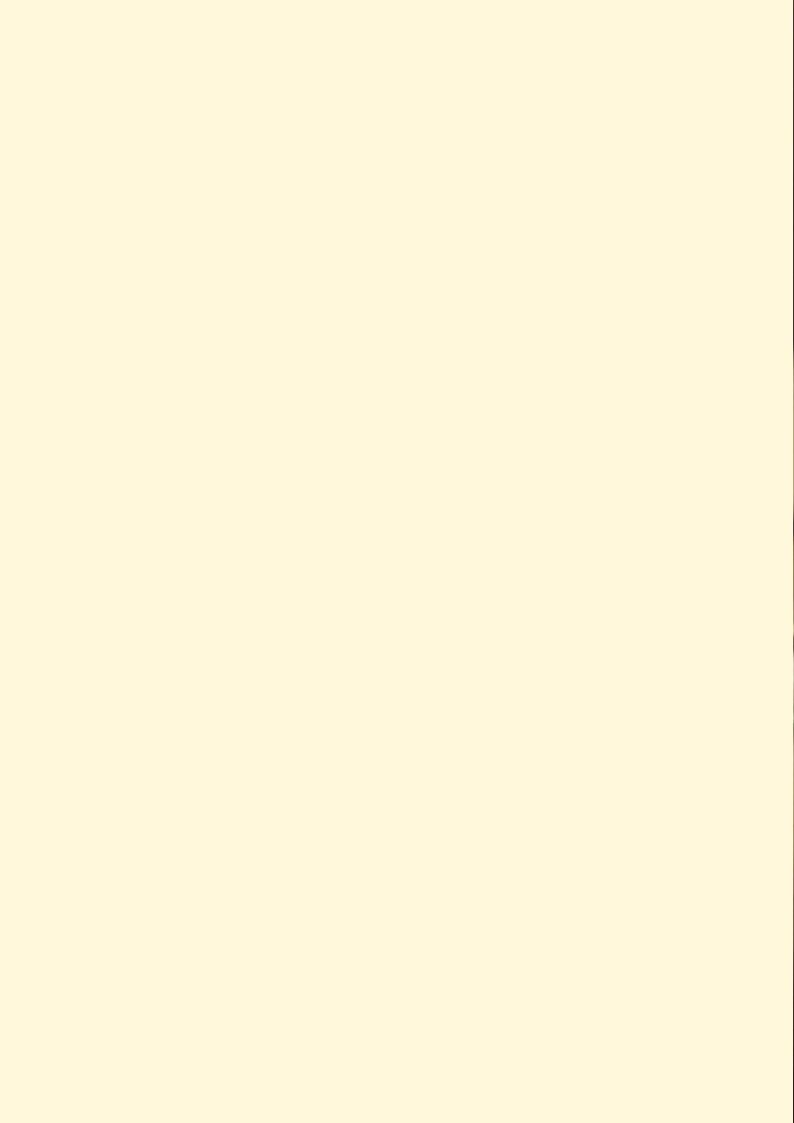

Lindström

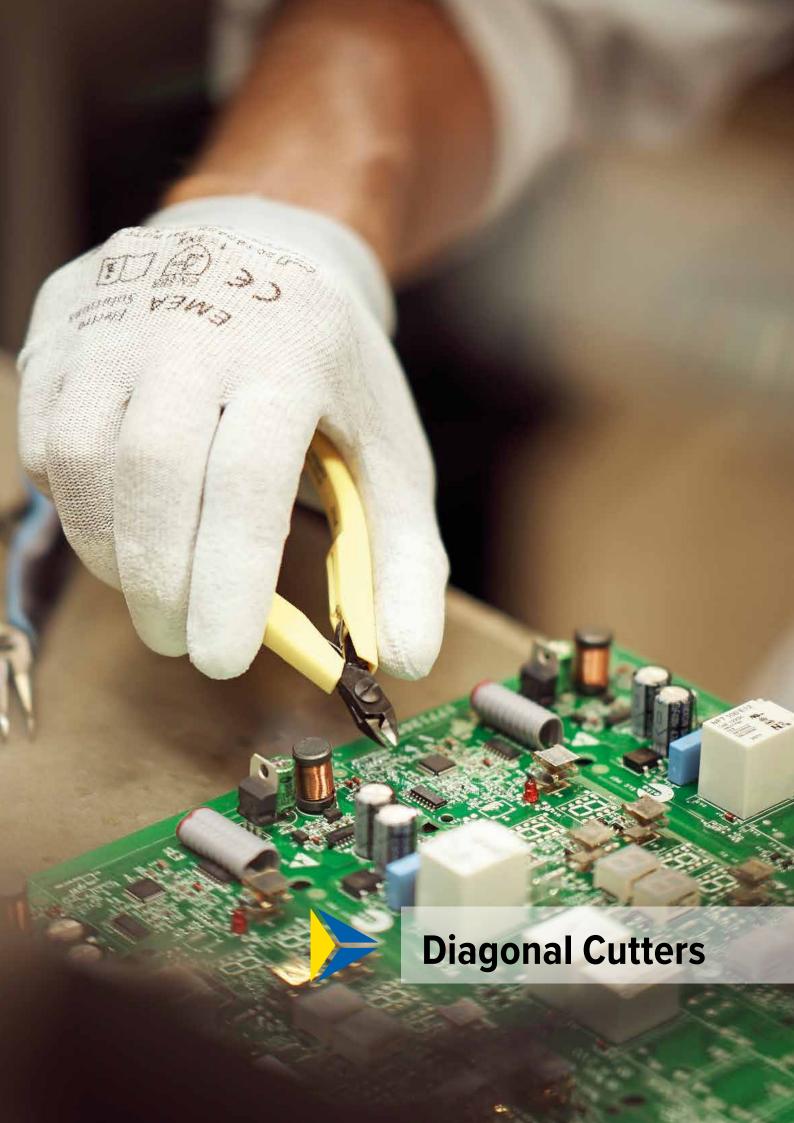

Supreme Series

for dependable results

The Supreme Series features a precision screw & nut in an advanced lap joint design. Joint play is held to a minimum, ensuring precise alignment of the jaws even at the tips. Supreme Series oblique end cutters are preferred by jewelry and wire artists, while transverse cutters are uniquely suited to trimming leads in hard to reach assemblies.

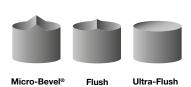

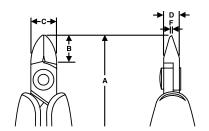

Oval Head

- Precision screw joint minimizes friction and maximizes alignment of cutting edges
- Precision induction hardened cutting edges 63–65 HRC
- Material: High performance alloy steel
- Cutting capacity is listed for solid copper wire
- Black Oxide finish

RX Series: Two-component ESD safe Ergo™ handles: Thermoplastic surface on tough polypropylene provides superior grip

- Micro-Touch™: The shape of the handles makes it possible to control and rotate the pliers between thumb and index finger for precision work
- Biospring reduces tension throughout the working cycle of the tool and can be adjusted in three different positions

Tapered Head

- Precision screw joint minimizes friction and maximizes alignment of cutting edges
- Precision induction hardened cutting edges 63–65 HRC
- Material: High performance alloy steel
- Cutting capacity is listed for solid copper wire
- Black Oxide finish

RX Series: Two-component ESD safe Ergo[™] handles: Thermoplastic surface on tough polypropylene provides superior grip

- Micro-Touch™: The shape of the handles makes it possible to control and rotate the pliers between thumb and index finger for precision work
- Biospring reduces tension throughout the working cycle of the tool and can be adjusted in three different positions

Unique cutting heads developed together with specific end-user to solve critical applications

7154TC Carbide Insert Cutter

- Carbide Insert Cutters suitable for hard wire materials such as Nitinol, Stainless Steel, Platinum and Titanium
- High performance alloy steel material provides strength and reliability
- Precision lap joint with screw minimizes friction while maximizing cutting edge and tip alignment
- ESD Safe, comfortable synthetic handles with return spring for smooth operation
- Polished, natural finish provides protection against oxidation
- Cutting capacity hard wire from 0.10 mm to 0.20 mm / 0.004 in to 0.016 in. And when tip cutting max 0.2 mm / 0.008 in
- 8154PSP designed for soft materials

Carbide Insert: ESD safe synthetic mono material with leaf springs

Performance Specific Series

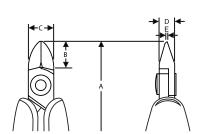

- Sharp and fully aligned edges
- Numerically controlled machining guarantees edge angle accuracy and contact, increasing the tools reliability and consistency
- Produced using high performance alloy steel material provides strength and reliability
- Induction hardening technique and modified cutting edges deliver precise cuts
- Precision screw joint minimizes friction while maximizing cutting edge and tip alignment
- ESD safe, comfortable synthetic handles with return springs for smooth operation
- Phosphate finish provides protection against oxidation and reduces glare under illumination

RX Series: Two-component ESD safe Ergo™ handles: Thermoplastic surface on tough polypropylene provides superior grip

• Biospring reduces tension throughout the working cycle of the tool and can be adjusted in three different positions

ERGO™ Precision Diagonal Plastic Cutters

- Developed according to the ERGO® process for a comfortable and effective grip in all situations
- Rivet joint that minimizes friction and maximizes jaw alignment
- ESD safe handles in 2-component synthetic material
- On/off spring enables reduced profile for easy storage
- Extremely strong construction for long lasting performance
- Designed to produce a Flush cut result on plastic, nylon and cabled wire applications

ERGO Side Cutter: Two-component ESD safe Ergo™ handles: Thermoplastic surface on tough polypropylene provides superior grip

Heavy Duty Diagonal Cutters

- Developed according to the ERGO® process for a comfortable and effective grip in all situations
- Progressive bevel cutting edge: The cutting bevel progresses along the edge in order to cut soft and thin material at the tip. Hard and thick material close to the joint
- Rivet joint minimizes friction and maximizes jaw alignment
- Cutting edges hardened to 63–65 HRC for durable performance
- High leverage joint to reduce cutting force
- Equipped with a return spring featuring an on/off function
- High performance alloy steel
- Black Oxide finish and anti-corrosion treated

Progressive Bevel technology for both soft and hard wire applications

PRECISION SHEAR CUTTERS

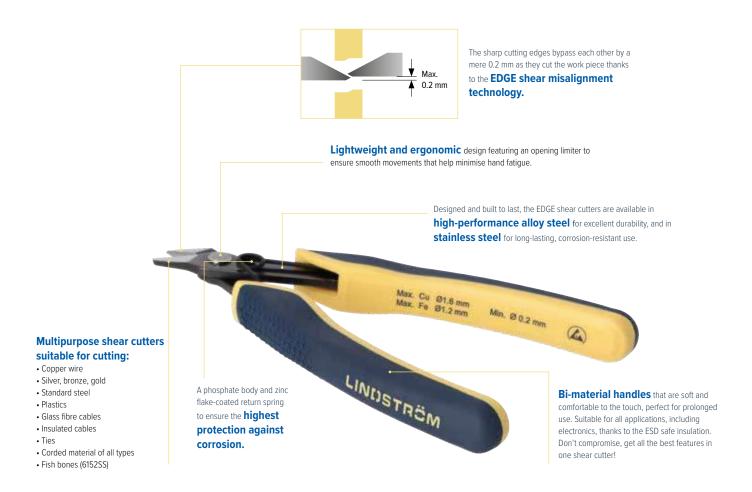

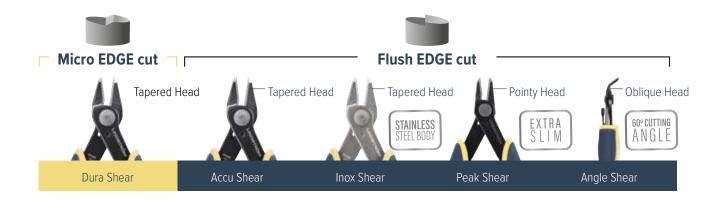

EDGE: A new line of precision shear cutters made by Lindström

Lindström has maintained an edge over the competition thanks to our focus on quality, technical know-how, customer service and commitment to innovation and technology for more than 160 years.

One such example are Lindström's original diagonal precision cutters, our highest-quality precision tools and the best on the market. Now, we are channelling this expertise into our newest line of shear cutters, EDGE, manufactured in the state-of-the-art Lindström facilities in Spain.

With our diverse end users in mind, we have maintained our commitment to quality to develop this more affordable line of durable, multipurpose shear cutters. Designed to meet the daily needs of professionals working in electronics, jewellery, watchmaking, precision engineering, fine mechanics and general industries, everyone from artisans to engineers can execute precise cuts and push the potential of their work.

The EDGE line of shear cutters

TAPERED HEAD

Dura Shear | 6151

The EDGE Dura Shear Cutters offer durability like no other. Their machine-ground symmetrical edge angles with bevels deliver a consistent Micro EDGE cut result, suitable for fine cutting work on sensitive electronics and precious metals, with a tapered head that facilitates access to compact spaces.

Accu Shear | 6152

The EDGE Accu Shear Cutters are the ultimate cutting tool for executing precise cuts, designed by experts for working with the finest and most precious materials. The by-pass cutting technology produces an extremely clean, flush cut of the workpiece, thanks to the unique EDGE shear misalignment of the induction-hardened cutting blades with non-bevelled edges.

Perfect for jewellery, watchmaking, fine mechanics, radio technicians, industrial electricians, mechatronics engineers and electronics engineers.

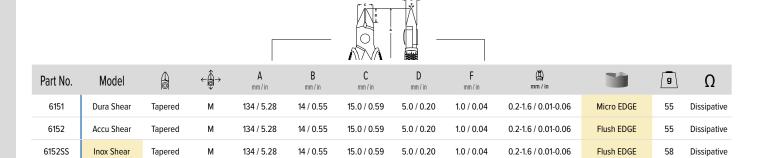

Inox Shear | 6152SS

The EDGE Inox Shear Cutters are the ideal cutting tool for working in cleanrooms. The 6152SS shear cutters are corrosion and wear resistant, making them the perfect choice for applications that require sterilised instruments. Achieve extremely clean, flush cuts thanks to the unique EDGE shear misalignment of the induction-hardened cutting blades with non-bevelled edges.

Perfect for cleanrooms, pharmaceutical industries, medical device manufacturing and the fish industry.

POINTY HEAD

Peak Shear | 6159

The EDGE Peak Shear Cutters offer outstanding accessibility for applications ranging from microscopy to micro-electronics applications. This model's unique, pointy head, symmetrical tips and non-bevelled blades provide maximum access and reach and allow users to get underneath delicate components and execute Flush EDGE cuts on hard-to-access wires.

Perfect for fine mechanics, industrial electricians, mechatronics engineers and micro-electronics specialists.

Part No.	Model		$\leftarrow \bigoplus_{i=1}^{n} \rightarrow$	A mm / in	B mm/in	C mm/in	D mm/in	E mm/in	G mm/in	H mm/in	∰ mm / in		g	Ω

OBLIQUE HEAD

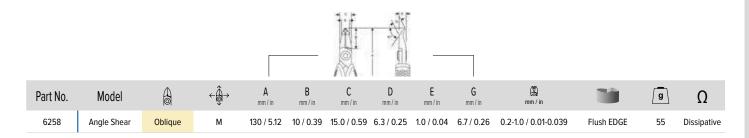

Angle Shear | 6258

The EDGE Angle Shear Cutters are the ideal tool for rework and close assembly cutting in electronics, allowing users to cut both horizontally and vertically. The 60° angle of the oblique head offers increased reach, visibility and accessibility under and between low-profile, fine-pitch components, ideal for assembly and rework where accessibility is a priority, such as printed circuit boards.

60° CUTTING ANGLE

Perfect for industrial electricians, mechatronics engineers, electronics engineers.

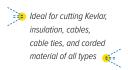

Multipurpose Shear

- User-friendly, durable and fits comfortably in either hand
- High carbon steel blades with a hardness of 57–59 HRC
- Serrations on one cutting edge to prevent the material being cut from sliding away (HS6000)
- Precision screw joint that minimizes friction and maximizes alignment of cutting edges
- ESD safe non-slip, foam cushioned grips

Unique Tools For Every Situation

Lindström customers are innovators, pushing the envelope, developing new technologies and building new industries. When presented with a need to prepare prototypes, insert or extract unique components, or cut proprietary hard wire, our customers turn to Lindström for Specially Engineered Tools.

Lindström has developed tools used in specialized applications for the largest names in medical device manufacturing and for small start-up companies developing new technology. Every project receives the same attention to detail for a tool that is right for the job at hand.

To make the process easy Lindström has no minimum order quantity for Specially Engineered Tools. Our tool designers and manufacturers representatives work directly with production engineers to ensure success. We thrive on solving problems with our customers.

Join our www.Lindströmtools.com website in the Customize area to develop your product together with us. You can also contact one of our authorized distributors all over the world or Lindström manufacturers representatives to discuss your special tool requirements.

The Lindström Design Process

The Lindström staff can design special application tools by working with "before" and "after" components, engineering drawings, or prototypes. We even build tools drawn on the back of a napkin. It's that easy!

A customer provides an idea for a specially engineered transistor

tool.

Every project begins v a blank tool.

Tools featured in this section are a small sample of over 1,500 different designs that we have manufactured so far. Several handle options are available on Specially Engineered Tools.

8154PSP precisely trims catheters.

RX331A-31 bend and cut pliers create precise two-angle bend and cuts lead the same length every time.

RX 601 forming pliers leave a standoff on the LED leads.

202A cut and clench tools leave a swaged, bent lead that clenches the PCB.

7292MI micro-mini end cutter is used to cut a ground wire inside a mini connector.

Lindström tool designer shapes the tool according to customer specifications.

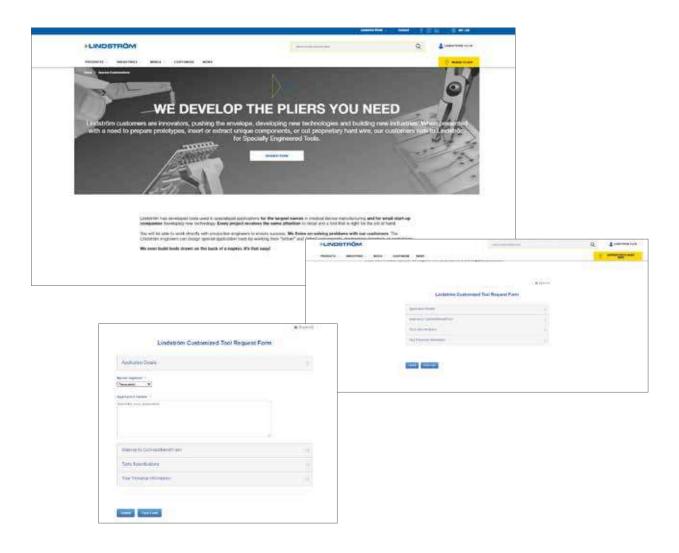

Finished Transistor Forming Pliers RX 601-16 ready for delivery!

Develop Your Customized Precision Cutter

The Tool Request Form allows you to customize your product live. In a few steps you will be able to send us your request and our manufacturing reps and engineering team will respond to you to discuss your needs.

IC INSERTION/EXTRACTION TOOLS & IC CUTTERS

IC Insertion/Extraction Tool

7992

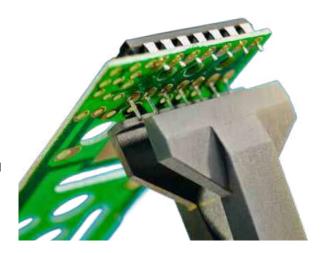

- The 7990-7993 family of insertion tools can be used for ICs or DIPs from 4 pin to 64 pin
- To order, indicate total number of pins on IC/DIP, length and width of package
- Tool length: 4.5 in / 114.3 mm
- Picture shows 80 Series handle

IC Cutter

RX 501

- IC cutters can be produced to cut up to 10 pins simultaneously
- Standoff length is typically 0.040 in (1 mm) but can vary according to specifications
- To order, indicate total number of pins on IC and standoff length. Example: For 14 pin IC, order Part No. 501-14
- Tool length: 6 in / 152.4 mm
- Tool can be produced with RX, 80 Series or HS handles as specified by end-user

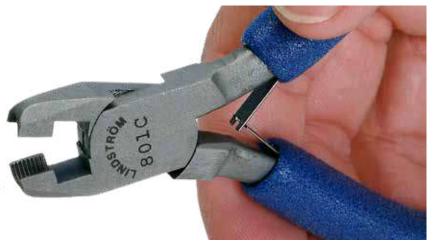

Coaxial cable connector TOOL

801C

- Reduces possibility of marred connector threads
- Tool length: 6 in / 152.4 mm
- Picture shows ESD safe foam handle

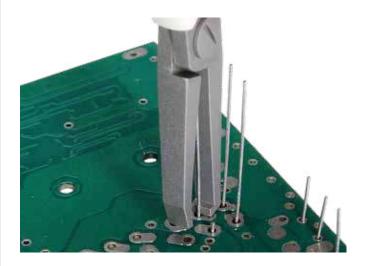

STANDOFF CUTTERS

111A

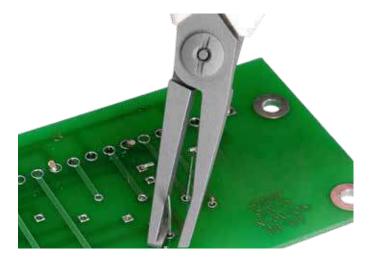

- Uncut lead length capacity: 1.000 in / 25.4 mm
- Cuts leads to length as needed
- Standard length is 0.075 in (1.9 mm) but varies according to specifications
- Cutter can be used on 18 AWG (1 mm) solid copper and also trims wire wrap pins
- To order other than 0.075 in standoff, specifiy length (Example: For 0.065 in standoff, order Part No. 111A-065)
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle

Straight Standoff Shear Cutter 0.040 in

RX112A-1.5

- Uncut lead length capacity: 0.75 in / 19 mm
- Anti-shock lead trimmer for use on 20 AWG (0.813 mm) copper wire or smaller
- Standoff is 0.040 in (1 mm) unless otherwise specified
- To order other than .040" standoff, specify length.
 Example: For 0.030 in standoff, order Part No. 112A-030)
- Tool length: 4.5 in / 114.3 mm
- Picture shows Supreme Series handle

Oblique Standoff Shear Cutter 0.045 in

121A

- Similar to 111A, heavy-duty type, featuring a 45° angle to allow clearance for longer lead lengths
- Standoff is 0.045 in (1.14 mm) unless otherwise specified
- To order other than 0.045 in standoff, specify length (Example: For 0.035 in standoff, order Part No. 121A-035)
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle
- Tool can be produced with RX, 80 Series or HS handles as specified by end-user

Specially Engineered Tools

STANDOFF CUTTERS

Oblique Stand-Off Shear Cutter

HS122M.030

- 45° angle offers good lead visibility, does not limit lead length
- Standard standoff is 0.030 in and can be ordered in other lengths
- To order other than 0.030 in indicate lead length as a suffix to the product code (example HS122M-080 for a stand-off of 0.080 in)
- Tool length: 6.5 in / 165.1 mm
- Picture shows HS Series handles

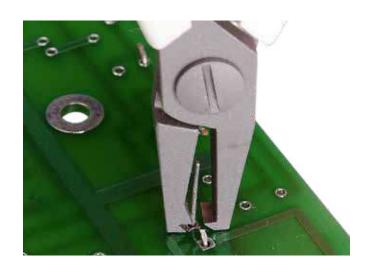

CUT and BEND

Straight Cut, Bend And Clench 0.060 in 20°

202A

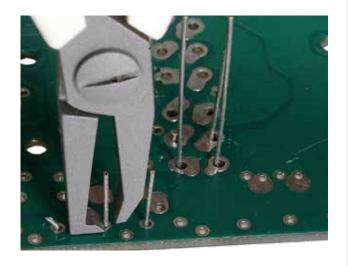

- Cuts leads to 0.060 in (1.52 mm) and bends them at a 20° angle
- To order other than 0.060 in and 20° indicate, cut lead length and angle (Example: For 0.050 in length and 30° angle, order Part No. 202A-050 30°)
- Tool length: 4.5 in / 114.3 mm
- Picture shows Supreme Series handle

Cut & Bend 0.060 in 45°

204B

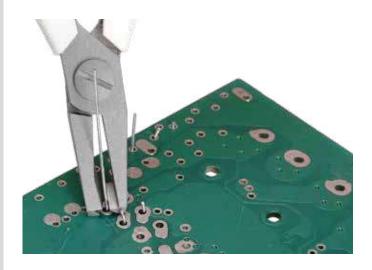

- Bends leads at 45° then cuts, leaving a 0.060 in (1.52 mm) standoff
- Other angles and lengths are available
- To order other than 45° and 0.060 in, indicate degree of bend required and lead length (Example: For 40° angle and 0.050 in length, order Part No. 204B-050 40°)
- Tool length: 4.5 in / 114.3 mm
- Picture shows Supreme Series handle

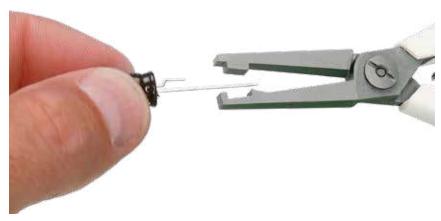

CUT and BEND

Oblique Cut, Bend And Clench 0.060 in 20° 212A

- Similar to a 202A featuring an oblique angle that offers improved lead visibility and accommodates longer leads
- To order other than 0.060 in and 20°, indicate cut lead length and angle (Example: For 0.055 in length and 35° angle, order Part No. 212A-055 35°)
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle

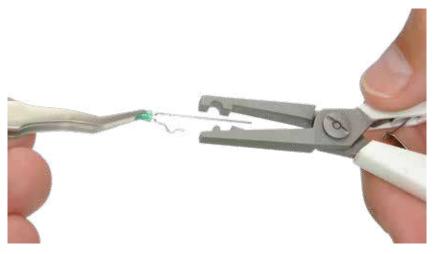

CUT and FORM

Cut And Form – Up To 18 Awg

RX331A

- Cuts leads and forms dogleg on solid copper as large as 18 AGW (1 mm)
- To order, furnish component or rough drawing indicating lead length, radii, diameter and bend locations
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle

Cut And Form – Up To 18 Awg

341A

- Cuts leads to length and forms stress relief on component leads up to 18 AWG (1 mm) solid copper
- To order, furnish component or rough drawing indicating lead length, radii, diameter and bend location
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle

→ LINDSTRÖM®

LEADFORMERS

Flat Pack Leadformer

RX304D

- Cuts and forms multi-lead flat packs
- To order, indicate length from component body to bend, angle of bend and length of tail
- Tool length: 6 in / 152.4 mm
- Picture shows RX Series handle
- 29D-SA Tweezer shown holding component

Leadformer – stress relief up to 18 AWG

601A

- Forms leads for stress relief up to 18 AWG (1 mm) solid copper
- To order, indicate lead length (minimum/maximum) from component body to P.C. board and lead diameter
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle

45° Oblique Leadformer - Unlimited Length

614A

- Adds stress relief to leads in high density board population applications
- Allows unlimited lead length forming with high visibility
- To order, indicate lead length (minimum/maximum) from component body to P.C. board and lead diameter
- Tool length: 6 in / 152.4 mm
- Picture shows Supreme Series handle

CUSTOM FORMING PLIERS

Custom Leadformer

RX 601-16

- Specially engineered leadforming pliers
- Turns 5 equal-length leads into 3 long and 2 short leads
- Typically used on transistors
- Picture shows RX Series handle

BIOSPRING FOR RX SERIES

- Tension is kept minimal and limited thoughout the working cycle of the tool
- Handle width is controlled for ease of tool pick-up and handling
- Tension and opening width can be adjusted according to preference via three ports

RX 01

- Almost indestructible in normal use
- On facing page, a spring is properly inserted for sure retention

1. Pull the tool apart 2. Place the spring in

RX SPRING ADJUSTMENT:

3. Close the tool

RETURN SPRING FOR 80, RX, HS, MEDICAL AND SUPREME SERIES

• Due to the long life of 80 Series, HS Series, Medical and Supreme Series cutters and pliers, replaceable springs help redown time and the need to stock substitute tools

Part No.	Cutters and Pliers	Weight grams	Pack qty
8130-50/SUPR SPRING	HS, Medical, 80 Series 8130-8158; all Supreme	2	1 PR
8160/SPRING	HS, Medical, 80 Series 8160-8168	2	1 PR

LEAD CATCHER FOR 80, RX, HS, MEDICAL AND SUPREME SERIES

· Patented lead catcher holds cut wires, preventing injury and keeping leads from flying into the assembly

- Sold in packs of 5

Always ready to go with Lindström spare parts

Product Details

Lindström introduces a precision screwdriver crafted in Spain to exacting engineering standards to satisfy the requirements for tools used in the most demanding, delicate, high precision electrostatic applications.

Lindström Precision Screwdrivers are ESD Safe and safely dissipate electrostatic charges, reducing the possibility of damage to sensitive components.

ESD SAFE

The requirements for the ESD Safe screwdrivers are specified in the European Standard IEC 61340. One of these requirements is a handle manufactured from a specific electrically conductive material to discharge uniformly. The Electrical Surface Resistance of the ESD Material amounts to 106-109 Ohm (Dissipative materials). This protects components against electricity and associated damage.

Lindström ESD Precision Screwdrivers satisfy this standard and also the most demanding requirements expected from any critical and technological industry.

QUALITY

Lindström ESD Safe Precision Screwdrivers are manufactured using a Chrome, Molybdenum-Vanadium alloy steel blade and hardened to 60 HRC providing the best wear resistance in the market. The high quality steel is combined with a precision machined black tip manufactured to exacting standards with guaranteed accurate dimensions in the tip.

The result is a screwdriver that delivers a precise fit with perfect engagement on the fastener while providing superior durability over a long life span.

DESIGN

For 165 years; design, comfort and safety have been part of our DNA. The new ESD Safe Precision Screwdriver ergonomic handle combines two materials including a thermostatic elastomer in the critical gripping area, resulting in the most comfortable handle on the market.

The handle's rotating head allows the tip to be perfectly positioned for fast comfortable finger movement during turning. The easy-movement rotating cap ensures rapid rotation and precise control.

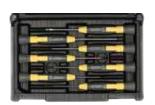

Product Range

- » ESD Safe Precision Screwdriver, safely dissipates electrostatic charges, protecting electronic components from damage.
- » Specially designed for precision work, for mechanical and electronic applications.
- » Two-component ergonomic handle with soft grip material for comfortable grip.
- » The handle rotating head allows the tip to be perfectly positioned for fast comfortable finger movement during turning.
- » The easy-movement rotating cap ensures rapid rotation and precise control.
- » Marking on the handle for an easy identification of tip.
- » Black oxide tip guarantees high accuracy and precision fitting.
- » High-performance alloy steel blade, chrome plated, for high protection against corrosion and long life span.

Screwdriver Sets

Set includes 7 ESD Safe Precision Screwdrivers

Part No.	Description	Pieces	Sizes
801-7ESD	Precision Screw Set 7Pcs	SET 7 pcs	1.5; 2; 2.5; 3; PH00; PH0; PH1
803-7ESD	Precision Screw Set 7Pcs	SET 7 pcs	T6; T7; T8; T9; T10; T15; T20

Slotted

For slotted head screws

Standards: ISO 2380 and DIN 5264

Standard IEC 61340-5-1, the electrical surface resistance of the ESD material amounts to 10^6 - 10^9 Ohm

Part No.	Description	Profile	Size x Length	Sizes
800-1.5-50ESD	Precision Screw Flat 1.5 X 50	Flat	1.5 x 50	Slotted 1.5 mm
800-2-50ESD	Precision Screw Flat 2.0 X 50	Flat	2.0 x 50	Slotted 2.0 mm
800-2.5-50ESD	Precision Screw Flat 2.5 X 50	Flat	2.5 x 50	Slotted 2.5 mm
800-3-50ESD	Precision Screw Flat 3.0 X 50	Flat	3.0 x 50	Slotted 3.0 mm

Phillips

For Phillips head screws

Standards: ISO 8764 and DIN 5260

Standard IEC 61340-5-1, the electrical surface resistance of the ESD material amounts to 106 - 109 Ohm

Part No.	Description	Profile	Size x Length	Sizes
801-00-50ESD	Precision Screw PH 00 X 50	Phillips	00 x 50	Phillips 00
801-0-50ESD	Precision Screw PH 0 X 50	Phillips	0 x 50	Phillips 0
801-1-75ESD	Precision Screw PH 1 X 75	Phillips	1 x 75	Phillips 1

TORX®

For TORX® head screws

Standard IEC 61340-5-1, the electrical surface resistance of the ESD material amounts to 106 - 109 Ohm

Part No.	Description	Profile	Size x Length	Sizes
803-6-50ESD	Precision Screw Torx® 6 X 50	Torx®	T6 x 50	Torx [®] 6
803-7-50ESD	Precision Screw Torx® 7 X 50	Torx®	T7 x 50	Torx® 7

Customized Kits

Lindström customers are innovators, pushing the envelope, developing new technologies and building new industries. Lindström has developed tools used in specialized applications for the largest names in medical device manufacturing and for small start-up companies developing new technology. Every project receives the same attention to detail and a tool that is right for the job at hand.

Now, in Lindström we have the possibility to create kits including our iconic:

- » Cutters & Pliers
- » Swiss Made Tweezers
- » ESD Safe Precision Screwdrivers

High Precision Torque Screwdrivers

Lindström Torque Screwdrivers eliminate the over-application of force, thereby reducing the risk for damage and rework costs. They feature an ergonomic shape, a durable positive grip powder-coated surface, and an anti-magnetic ESD safe bit holder that accepts any standard 1/4" Hex drive bit.

The two models available are the Micro-Adjustable Torque Screwdriver and the Preset Torque Screwdriver.

HIGH PRECISION TORQUE CONTROL

With a unique high-precision cam-over torque-limiting design, Lindström's torque screwdrivers eliminate over application of force reducing the risk of damage and rework costs. Available in micro-adjustable or preset torque versions, Lindström's torque screwdrivers offer comfort with a user friendly shape and non-slip grip. Built to last with a non-magnetic bit holder that accepts any standard 1/4" Hex drive Bit, it is the ideal choice for flexible applications as well as volume production. All models are ESD-safe.

MICRO-ADJUSTABLE TORQUE SCREWDRIVERS

The micro-adjustable torque screwdriver allows instant change to the torque value with an easy-to-read window scale and a precise pull-to-set, push-to-lock mechanism. Adjustment is easy - simply pull the knob, turn to the desired torque, push the knob back in, and it is ready to use.

The micro-adjustable screwdriver series includes three models ranging from 14 to 451.94 Ncm or 20 in.oz. to 40 in.lbs. Accuracy +/- 6%.

PRESET TORQUE SCREWDRIVER

An outstanding selection for high-volume use in assembly where precision and repeatability is paramount. Torque values are easily set on this durable driver.

The end cap removes for access to the 1/8" Hex adjustment screw (Hex key included with each driver). Use a certified torque tester to verify the exact torque value after adjustment. Replace the end cap and it's ready to go.

All Lindström torque devices are ESD safe.

Warning! Lindström Torque Screwdrivers should never be used on electrified equipment.

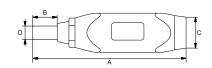

MICRO-ADJUSTABLE TORQUE SCREWDRIVER

- ESD safe (IEC 61340-5-1)
- Torque limiting clutch prevents over application of force to fastener
- 1/4" Hexagon anti-magnetic spring loaded bit holder to avoid ESD damage to sensitive equipment or components in electronic applications
- Adjustable Torque Screwdriver, with all metal 3-lobe shaped handle
- Powder coat wrinkle finish provides positive grip
- Cam-over torque limiting clutch for repeatability
- Store driver in the protective case at lowest torque setting
- Accuracy meets or exceeds +/-6% over recommended usage period: 5.000 cycles or one year, whichever occurs first
- Clockwise torque measurement only. It can be used to loosen fasteners without affecting the internal mechanism
- Cam-Over technology provides tactile and audible feedback when torque values are reached
- Supplied with an internal declaration of conformity in compliance with International standards
- ISO 6789, ISO 1174, ASME B107.300-2010
- Made in USA

Part No.	cn-M	in-oz	in-lb	0	cN-M	A mm / in	B mm/in	C mm / in	D mm / in	kg

PS501-4	45-450 cNM	4-40 in·lbs	1/4 in	6.06 / 154	18.2 / 0.72	32 / 1.26	9.6 / 0.38	0.270

To order with torque values set, add "SET" as a suffix to the part number and the desires torque value. Example: PS501-3DSET - 7 In. Oz.

Lindström > launches its most comprehensive range of tweezers

Know How:

With over 150 years of knowledge and experience, Lindström knows that working with fragile and expensive materials is a daily reality for many professionals, so this range has been developed to handle, manoeuvre and position components, jewels and wires with the utmost care and confidence. As trusted partners of the medical device, electronics, watch making and jewellery industries, we have designed an extensive range of specialist tweezers for the most demanding applications, such as the Tungsten Carbide Cutting Tweezers with angled blades, designed for cutting hard hairsprings such as coils, coiled catheters and stents, as well as stainless steel wires for hearing aids and pacemakers. Other designs in this range feature curved, pointed, slender and flat edge tips to deliver precision, safety and strength to any job.

Quality:

Thanks to Lindström's unwavering focus on quality and design, this new range of tweezers incorporates many specialist tips made from high-quality and highly resilient materials, including stainless steel and polyamide-based carbon fibre, which are ESD safe, perfect for electronics assembly and able to withstand temperatures of up to 150 °C. Lindström's ESD-safe tweezers also feature soft, ergonomic grips (109 ohm resistivity) that are more comfortable and reduce finger stress when handling ESD-sensitive components and small static items.

Plastic-tip tweezers, also ESD-safe and reinforced with carbon fibre, do not scratch and are also suitable for electronics and medical applications.

Innovation:

With our sights set firmly on the future and on bringing customers the best-quality tools on the market, at Linds-tröm, we are always looking for new ways to innovate and meet the most demanding standards. That's why we also offer tailor-made tools designed for specific fields, to help professionals excel at what they do best. Visit the new webpage to view the full range of tweezers, or fill in the Lindström customised tool request form and tell us exactly what you're looking for.

The new range of Lindström Tweezers meets the needs of the most demanding end-users in the world, who can now choose from hundreds of designs and a wide range of material, such as stainless steel, carbon steel, plastic, ceramic, and ESD Safe Materials. The tweezers can be used in many different field to perform intricate work. Their unique structure and manufacturing materials mean that these tweezers can be used to carefully and safely handle different samples, substances and objects.

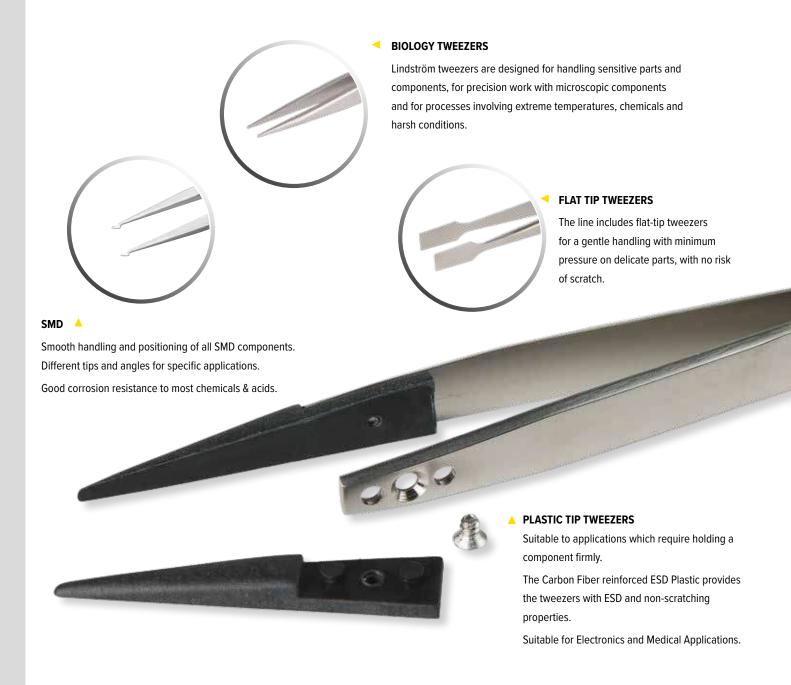

Swiss-made and designed for the medical device industry to cut hard hairsprings such as coils, coiled catheters or sents, as well as stainless steel wires used to produce hearing aids, pacemakers or even for the detailed cutting of plastic moulds.

High Precision Tungsten Carbide Cutting Tweezer

Lindström >

Tweezers styles for every application

EXTRA STRENGTH, GENERAL PURPOSE

Large and strong tips with perfect balance, symmetry and alignment for demanding tasks of all types.

Anti-magnetic/anti-acid steel.

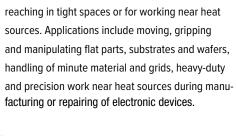

Very accurate finish for a wide variety of applications from electronics to bio medical uses. Extremely accurate serration quality. Different lengths, thicknesses and angles for every application. Stainless and/or anti-magnetic/anti-acid steel.

Long and slender tweezers especially suited for

249CFR-SA

ECONOMY TWEEZERS

Competitively priced, high quality tweezers. ESD safe for secure use in electronics assembly. Anti-acid stainless steel for durable performance.

HIGH PRECISION A

High precision tweezers are skillfully handcrafted to offer polished edges and a superior no-scratch/ antiglare satin finish. Used for microscopic work, precision handling, repair and manufacturing of electronic machinery along with other general applications, high precision tweezers guarantee the perfect symmetry and balance of tips.

ESD SAFE TWEEZERS >

Soft ESD safe ergonomic cushion grips (resistivity 109 Ohm) provide enhanced operator comfort and reduced finger stress when handling ESD sensitive components or small static items.

DR handles are recommended for use in Clean Rooms and controlled environments.

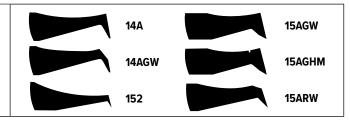

TWEEZER CATEGORIES

CATEGORY DESCRIPTION MOST POPULAR STYLES HIGH PRECISION TW Handcrafted to have perfect tip symmetry and balance along with polished edges and superior no-scratch/antiglare satin finish. Typical applications include 0 3 microscopy preparation, sample handling, precision manufacturing, electronic industry, watch making, general laboratory and medical applications. 00 BIOLOGY TWEEZERS - Made of high-alloy stainless steel (DX) and superalloy (CX). The perfect choice to be used under microscope as their extra fine tips are **2**A ideal for handling extremely minute, delicate material and grids. ► HP - FLAT TIP 35A 33A Smooth scratch proof tips designed for handling sensitive parts and components. Applications include moving, gripping and manipulating flat parts, substrates and wafers. The smooth, flat tips enable gentle handling and minimum 36A pressure on delicate parts. ••••• HP - SUPER SLIM Long and slender tweezers especially suited for reaching in tight spaces or for 65A SS working near heat sources.

Made from High Grade Carbon Steel for superior high precision cutting edges, these tweezers feature a tapered narrow design for narrow working spaces and are available with angled blades, predominantly angled blades, parallel blades, rounded tips, hard metal carbide blades and miniature size. Applications include cutting soft wires such as copper, gold, silver as well as magnetic wires and hard hairsprings.

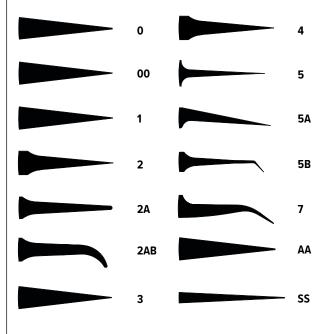

ESD SAFE TW

ESD SAFE GRIP HANDLE

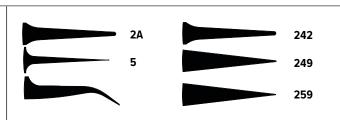

Soft ESD safe ergonomic cushion grips (resistivity 10° Ohm) provide enhanced operator comfort and reduced finger stress when handling ESD sensitive components or small static items. Two different handles are available: ESD safe blue Rubber (DR) or ESD safe black Foam (DN).

PLASTIC TW

Specially designed for the electronics industry, these tweezers feature durable and self-aligning replacement tips, anti-magnetic stainless steel handles and are available with a variety of tip geometries and materials: they offer a significant cost savings. Excellent for handling sensitive electronic components, and ceramic and glass parts where non-metallic non-scratching is critical.

TWEEZER CATEGORIES

CATEGORY DESCRIPTION MOST POPULAR STYLES REVERSE ACTION TW Uniform tension in handling small fragile parts for extended periods of time without finger strain. Specially intended for applications where a high precise 5A self-closing action is required such as in microscopy and assembly applica-> SMD TW SM103 SM108 The variety of tips and angles available on SMD Tweezers allow for smooth handling and positioning of all Surface Mount Device components. Satin antiglare finish and ergonomic design. Available as reverse action model. SM111 Ideal for electronics assembly, labs, clean rooms and circuit board repair and rework. SM115 MINI TW Short fine tip tweezers without the excess bulk of long tweezers. Very light, ergonomic tweezers ideal for working into tight spaces, under the limited working area of a microscope and for short range precision work. Applications include: specimen handling, microscopy preparation, sorting, precision manufacturing, electronic assembly, watch making, general laboratory, biological and medical applications. **BOLEY TW** GG General purpose tweezers available in different materials for specific applications. All shanks are tapered and have beveled edges. The sharp points have received some finishing at the tips. BB TWEEZER KITS **HIGH PRECISION TW ESD SAFE EPOXY COATED TW ECONOMY TW PLASTIC TW** Lindström offers an assortment of tweezer kits specially comprised to match specific needs and applications. Applications include SMD handling and repair and micro assembly. Specific tasks include moving, gripping and manipulating fine wires, substrates, leads, components and other small parts too delicate, small or sterile to be handled by human fingers. Ideal for labs, cleanrooms, electronics assembly applications and circuit board rework/repair. **REVERSE ACTION TW SMD TW ECONOMY TW** 00 5 The most popular tweezers are also available in economical version at a very competitive price. Made in Asia and re-worked for a consistent performance. 3

- Made in Switzerland

Precision SMD Tweezers Type SM 104

Type SM104 precision SMD tweezers are made for handling and positioning 3 lead SOT packages and monolithic chip capacitors.

- Type SM104
- Tip description: handling and positioning SOT packages, monolithic chip capacitors, straight

Part No.	=	<u> </u>	<u> ← </u>		=	>						g	OZ
TL SM 104-SA	SM104	120 mm	4,72 in	10 mm	0,39 in	11 mm	0,43 in	0,35 mm	0,01 in	1,7 mm	0,07 in	15 g	0.53 oz

Precision SMD Tweezers Type SM 105

Type SM105 precision SMD tweezers are specially designed for positioning all SOT packages vertically.

- Type SM10F
- Tip description: handling, positioning SOT packages vertically, hammer shaped, straight

Part No.	\sim	<u> </u> ——	 					`)				g	OZ
TL SM 105-SA	SM105	120 mm	4,72 in	10 mm	0,39 in	11 mm	0,43 in	0,35 mm	0,01 in	1,6 mm	0,06 in	15 g	0.53 oz

Precision SMD Tweezers Type SM 106

Type SM106 precision SMD tweezers are specially designed for positioning all SOT packages horizontally.

- Type SM106
- $\bullet\,$ Tip description: handling, positioning SOT packages, fine shaped, straight

Part No.	S	 ← L →	<u> </u>		=					•		g	OZ
TL SM106-SA	SM106	120 mm	4,72 in	11 mm	0,43 in	11 mm	0,43 in	0,25 mm	0,01 in	3,8 mm	0,15 in	15 g	0,53 oz

Precision SMD Tweezers Type SM 108

Type SM108 precision SMD tweezers are specially designed for positioning and soldering 1-mm wide components. The groove on the handle allows reducing tension applied on the component to avoid damage.

- Type SM108
- Tip description: positioning, soldering 1mm wide components, straight

Part No.	S	<u> </u> ←	 ← L →		=	-	-		.);	1		g	OZ

Plastic Replaceable Tip Table

WARRANTY

Lindström brand tools carry a full guarantee covering defects in manufacturing material and workmanship.

Lindström does not offer, suggest nor imply a lifetime warranty applies to any tool, product or service.

Tools subjected to misapplication, abnormal use, abuse, alteration, or continued use after the tool is significantly worn, are not covered by this warranty. The Lindström facility conducts all tool evaluations for warranty claims.

Warranty Address: SNA Europe [UK] Moorhead Way Bramley, Rotherham South Yorkshire S66 1YY

E-mail: sales.uk@snaeurope.com

Questions involving the performance of your Lindström tools should be directed to our customer service office listed above.

SERVICES

Only factory-authorized service can offer resharpening and reconditioning that keeps the Lindström warranty intact. Our service center in Midland, GA offers a full range of reconditioning, calibration and tool sharpening for all Lindström brand products and other brands. Services offered include:

- Cutter reconditioning: Sharpening cutting edges, installing new grips & springs, adjusting the joint
- Sharpening only: Cutters, scissors, cutting tweezers
- Pliers reconditioning: Jaw resurfacing, installing new grips and springs and adjusting the joint
- Recalibration: Repair, recalibration, and recertification for torque screwdrivers
- Tweezers reconditioning: Tip straightening and realignmen

Call 800 446 7404 or E-mail us at sales.uk@snaeurope.com for pricing and lead-time.
